PROFESSIONAL SUMMARY

Full-Stack Developer and indie maker who independently designed, built, launched, and maintains Ucoder Insight — a production-grade, privacy-first SaaS analytics platform live at insights.ucoder.in with real users serving 10+ active projects. Experienced in end-to-end product ownership: system architecture, REST API development, React/Next.js dashboards, cloud deployment on Azure, and npm package publishing. Strong focus on performance optimization, scalable backend design, and shipping products that solve real problems.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python

Frontend: React.js, Next.js, Tailwind CSS, Shadcn UI, HTML5, CSS3

Backend: Node.js, Express.js, RESTful API Design, JWT Authentication, BullMQ, Socket.io

Databases & Cache: MongoDB, PostgreSQL, Supabase, Redis, NoSQL & SQL Design

Cloud & DevOps: Cloudflare CDN & DDoS Protection, PM2, Git, GitHub, CI/CD

Other: npm Package Development, System Design, GDPR/CCPA Compliance, E2EE Architecture, Agile

PROJECTS & EXPERIENCE

Ucoder Insight — Full-Stack SaaS Analytics Platform | insights.ucoder.in Nov 2025 – Present

Solo-built, launched, and actively maintains a production-grade privacy-first web analytics SaaS — handling system design, backend engineering, frontend dashboard, SDK publishing, and cloud deployment end-to-end.

- Reduced API response time from 3–4s to ~400ms by migrating event storage to MongoDB Time-Series collections, resulting in 10x faster dashboard queries under production load.
- Eliminated synchronous write bottlenecks by architecting a Redis + BullMQ async event processing pipeline, resulting in sub-100ms SDK response time and zero dropped events at scale.
- Published open-source npm package (ucoder-insight, ~7.4KB gzipped) with 1000+ total download and zero IP storage and zero tracking cookies, resulting in GDPR/CCPA compliance without requiring user consent banners.
- Designed polyglot persistence layer — MongoDB Time-Series for high-volume analytics events and PostgreSQL via Supabase for relational user/project data — resulting in optimized read/write throughput per data type.
- Deployed and maintained production backend on Microsoft Azure VPS with Cloudflare CDN, DDoS protection, Nginx reverse proxy, and PM2 process management, achieving 99%+ uptime since launch.
- Engineered domain ownership verification (DNS TXT record + HTML meta tag) to prevent unauthorized site tracking, resulting in secure multi-tenant project isolation across all user accounts.

Tech Stack: Node.js • TypeScript • MongoDB Time-Series • PostgreSQL (Supabase) • Redis • BullMQ • Next.js • React • Tailwind CSS • Microsoft Azure • Cloudflare • PM2 • Nginx

EDUCATION

B.Tech — Computer Science & Engineering | Swami Vivekananda University Expected 2027

CGPA: 8.0 / 10.0

Class XII — West Bengal Board | 74%

2023

Class X — West Bengal Board | 91.28%

2021

CERTIFICATIONS & HACKATHON

Node.js (Basic) • JavaScript (Basic & Intermediate) • REST API (Intermediate) Hacker Rank — Verified

Design & Analysis of Algorithms

NPTEL — MoE, Govt. of India

Programming with Java (92%)

NPTEL — MoE, Govt. of India

INNOVAT3 Web3 Hackathon (36-hours)

IEM Kolkata • Google Developer Group

React
